this is the second of three volumes of a corpus publication of the greek bilingual and

trilingual inscriptions from ptolemaic egypt covering the period from alexander s conquest in 332 bc to the fall of alexandria to the romans in 30 bc this volume contains 221 numbered items some covering multiple short texts from the fayum and middle and upper egypt including the thebaid it presents up to date scholarly revisions of the texts with translations full descriptions and commentaries drawing on material originally collected by the late p m fraser the inscriptions from the fayum illustrate the development of towns and villages in a region which was particularly re shaped by greek immigrants while the texts from upper egypt and the thebaid reflect the persistence of indigenous egyptian traditions and their interaction with the impact of greek culture the inscriptions range from copies of major priestly and royal decrees civic administrative documents and asylum petitions involving egyptian and greek temples and cults to dedications to gods monarchs and private individuals funerary texts pilgrimage notices and verse inscriptions including re editions and reassessments of the isis hymns from narmouthis and the herodes funerary epigrams from edfu together with their hieroglyphic counterparts the corpus supersedes older publications and other partial collections organised by specific region or theme and offers for the first time a full picture of the greek and multilingual epigraphic landscape of the ptolemaic period it will be an indispensable resource for new and continuing research into the history society and culture of ptolemaic egypt and the wider hellenistic world

this book is designed as a text for a first course on functional analysis for ad vanced undergraduates or for beginning graduate students it can be used in the undergraduate curriculum for an honors seminar or for a capstone course it can also be used for self study or independent study the course prerequisites are few but a certain degree of mathematical sophistication is required a reader must have had the equivalent of a first real analysis course as might be taught using 25 or 109 and a first linear algebra course knowledge of the

lebesgue integral is not a prerequisite throughout the book we use elementary facts about the complex numbers these are gathered in appendix a in one specific place section 5.3 we require a few properties of analytic functions these are usually taught in the first half of an undergraduate complex analysis course because we want this book to be accessible to students who have not taken a course on complex function theory a complete description of the needed results is given however we do not prove these results

in this broad introduction to topology the author searches for topological invariants of spaces together with techniques for calculating them students with knowledge of real analysis elementary group theory and linear algebra will quickly become familiar with a wide variety of techniques and applications involving point set geometric and algebraic topology over 139 illustrations and more than 350 problems of various difficulties will help students gain a rounded understanding of the subject
