nowadays the field of microbiology is undergoing a revolutionary change due to the
emergence of artificial intelligence ai is being used to analyze massive data in a
predictable form about the behavior of microorganisms to solve microbial
classification related problems exploring the interaction between microorganisms
and the surrounding environment it also helps to extract novel microbial metabolites
which have been used in various fields like medical food and agricultural industries
as the pace of innovation in microbiology is accelerating the use of ai in these
industries will be beneficial ai will not only show its extraordinary potential in
expanding the market of antibiotics food and agriculture but also offer an eco
friendly safer and profitable solution to the respective industries it would be
challenging to search out specific features and discuss future research on ai in
microbiology with a wide perspective uncovering extended functions of ai in

microbiology production and development of novel drug targets through ai challenges for using and selecting appropriate ai tools in health agriculture and food sector

the book details many management courses available in india for students at the diploma graduate and post graduate level it provides relevant information regarding courses duration institutions and other necessary guidelines

mtg physics for you is the monthly package for your readiness for cbse boards jee main advanced neet and other regional engineering entrance exams practice with a wide extent of mcqs practice papers solved dependent on the most recent syllabus and push a stride ahead toward progress

science technology and medicine all contributed to the emerging modern japanese empire and conditioned key elements of post war development as the only emerging non western country that was a colonial power in its own right japan utilized these fields not only to define itself as racially different from other asian countries and thus justify its imperialist activities but also to position itself within the civilized and enlightened world with the advantages of modern science technologies and medicine this book explores the ways in which scientists engineers and physicians worked directly and indirectly to support the creation of a new japanese empire focussing on the eve of world war i and linking their efforts to later post war developments by claiming status as a modern internationally engaged country the japanese government was faced with having to control pathogens that might otherwise not have threatened the nation through the use of traditional and innovative techniques this volume shows how the government was able to fulfil the state s responsibility to protect society to varying degrees chapter 14 of this book is freely available as a downloadable open access pdf at taylorfrancis com under a creative commons attribution non commercial no derivatives cc by nc nd 4 0 license

environmental sustainability is one of the biggest issues faced by the mankind rapid rampant industrialization has put great pressure on the natural resources to make our planet a sustainable ecosystem habitable for future generations provide equal opportunity for all the living creatures we not only need to make corrections but also remediate the polluted natural resources the low input biotechnological techniques involving microbes and plants can provide the solution for resurrecting the ecosystems bioremediation and biodegradation can be used to improve the conditions of polluted soil and water bodies green energy involving biofuels have to replace the fossil fuels to combat pollution global warming biological alternatives bioinoculants have to replace harmful chemicals for maintaining sustainability of agro ecosystems the book will cover the latest developments in environmental

biotech so as to use in clearing and maintaining the ecosystems for sustainable future

this text brings critical ethnographic perspectives to bear on the negotiation of language literacy and power in culturally and linguistically diverse contexts showing how literacy and schooling are negotiated by children and adults and how schooling becomes a key site of struggle over whose knowledge discourses and literacy practices count

monthly magazine devoted to topics of general scientific interest
