in recent years there have been increasing efforts to use accountability systems based on large scale tests of students as a mechanism for improving student achievement the federal no child left behind act nclb is a prominent example of such an effort but it is only the continuation of a steady trend toward greater test based accountability in education that has been going on for decades over time such accountability systems included ever stronger incentives to motivate school administrators teachers and students to perform better incentives and test based accountability in education reviews and synthesizes relevant research from economics psychology education and related fields about how incentives work in educational accountability systems the book helps identify circumstances in which test based incentives may have a positive or a negative impact on student learning and offers recommendations for how to improve current test based accountability policies the most important directions for further research are also highlighted for the first time research and theory on incentives from the fields of economics psychology and educational measurement have all been pulled together and synthesized incentives and test based accountability in education will inform people about the motivation of educators and students and inform policy discussions about nclb and state accountability systems education researchers k 12 school administrators and teachers as well as graduate students studying education policy and educational measurement will use this book to learn more about the motivation of educators and students education policy makers at all levels of government will rely on this book to inform policy discussions about nclb and state accountability systems

this second edition of grades and grading practices not only contains updated and refreshed material on the problems caused by our current grading system it also provides two additional chapters dealing with the present issues on assessment standards and social promotion designed to assist teachers instructors curriculum persons and administrators who desire to implement cooperative thinking and problem solving skills into the existing grading practices this book calls attention to the obstacles that have been created while poor grades may nudge some students to better performance there are other students low achievers who are demoralized by poor grades bringing about a variety of behavioral difficulties that have a negative effect on future incentive to learn good grades are motivating but the only students who are motivated are those already getting good grades success is fundamental to achievement lack of success means lack of achievement the failing grades are

indicative of our failure to provide success for most students who receive them this book explores the problems caused by grades and offers suggestions to improve the quality of american education

rethink traditional teaching methods to improve student learning and retention in stem educational research has repeatedly shown that compared to traditional teacher centered instruction certain learner centered methods lead to improved learning outcomes greater development of critical high level skills and increased retention in science technology engineering and mathematics stem disciplines teaching and learning stem presents a trove of practical research based strategies for designing and teaching stem courses at the university community college and high school levels the book draws on the authors extensive backgrounds and decades of experience in stem education and faculty development its engaging and well illustrated descriptions will equip you to implement the strategies in your courses and to deal effectively with problems including student resistance that might occur in the implementation the book will help you plan and conduct class sessions in which students are actively engaged no matter how large the class is make good use of technology in face to face online and hybrid courses and flipped classrooms assess how well students are acquiring the knowledge skills and conceptual understanding the course is designed to teach help students develop expert problem solving skills and skills in communication creative thinking critical thinking high performance teamwork and self directed learning meet the learning needs of stem students with a broad diversity of attributes and backgrounds the strategies presented in teaching and learning stem don t require revolutionary time intensive changes in your teaching but rather a gradual integration of traditional and new methods the result will be continual improvement in your teaching and your students learning more information about teaching and learning stem can be found at educationdesignsinc.com book including its preface foreword table of contents first chapter a reading guide and reviews in 10 prominent stem education journals
