

would normally expect to be registered with horror in the penal colony describes the last use of an elaborate torture and execution device that carves the sentence of the condemned prisoner on his skin before letting him die all in the course of twelve hours as the plot unfolds the reader learns more and more about the machine including its origin and original justification excerpt from wikipedia

it s a peculiar apparatus said the officer to the traveller gazing with a certain admiration at the device with which he was of course thoroughly familiar it appeared that the traveller had responded to the invitation of the commandant only out of politeness when he had been asked to attend the execution of a soldier condemned for disobeying and insulting his superior of course interest in the execution was not very high even in the penal colony itself at least here in the small deep sandy valley closed in on all sides by barren slopes apart from the officer and the traveller there were present only the condemned a vacant looking man with a broad mouth and dilapidated hair and face and the soldier who held the heavy chain to which were connected the small chains which bound the condemned man by his feet and wrist bones as well as by his neck and which were also linked to each other by connecting chains the condemned man incidentally had an expression of such dog like resignation that it looked as if one could set him free to roam around the slopes and would only have to whistle at the start of the execution for him to return the traveller had little interest in the apparatus and walked back and forth behind the condemned man almost visibly indifferent while the officer took care of the final preparations sometimes he crawled under the apparatus which was built deep into the earth and sometimes he climbed up a ladder to inspect the upper parts these were really jobs which could have been left to a mechanic but the officer carried them out with great enthusiasm maybe because he was particularly fond of this apparatus or maybe because there was some other reason why one could not trust the work to anyone else it s all ready now he finally cried and climbed back down the ladder he was unusually tired breathing with his mouth wide open and he had pushed two fine lady s handkerchiefs under the collar of his uniform these uniforms are really too heavy for the tropics the traveller said instead of asking some questions about the apparatus as the officer had expected that s true said the officer he washed the oil and grease from his dirty hands in a bucket of water standing ready but they mean home and we don t want to lose our homeland now have a look at this apparatus he added immediately drying his hands with a towel and pointing to the device up to this point i had to do some work by hand but from now on the apparatus should work entirely on its own the traveller nodded and followed the officer the latter tried to protect himself against all eventualities by saying of course breakdowns do happen i really hope none will occur today but we must be prepared for it the apparatus is supposed to keep going for twelve hours without interruption but if any breakdowns do occur they ll only be very minor and we ll deal with them right away don t you want to sit down he asked finally as he pulled out a chair from a pile of

cane chairs and offered it to the traveller the latter could not refuse he sat on the edge of the pit into which he cast a fleeting glance it was not very deep on one side of the hole the piled earth was heaped up into a wall on the other side stood the apparatus i don t know the officer said whether the commandant has already explained the apparatus to you the traveller made an vague gesture with his hand that was good enough for the officer for now he could explain the apparatus himself this apparatus he said grasping a connecting rod and leaning against it is our previous commandant s invention i also worked with him on the very first tests and took part in all the work right up to its completion however the credit for the invention belongs to him alone have you heard of our previous commandant no well i m not claiming too much when i say that the organization of the entire penal colony is his work we his friends already knew at the time of his death that the administration of the colony was so self contained that even if his successor had a thousand new plans in mind he would not be able to alter anything of the old plan at least not for several years and our prediction has held the new commandant has had to recognize that it s a shame that you didn t know the previous commandant however the officer said interrupting himself i m chattering and his apparatus stands here in front of us as you see it consists of three parts with the passage of time certain popular names have been developed for each of these parts the one underneath is called the bed the upper one is called the inscriber and here in the middle this moving part is called the harrow the harrow the traveller asked he had not been listening with full attention the sun was excessively strong trapped in the shadowless valley and one could hardly collect one s thoughts so the officer appeared to him all the more admirable in his tight tunic weighed down with epaulettes and festooned with braid ready to go on parade as he explained the matter so eagerly and while he was talking adjusted screws here and there with a screwdriver

about the book a report to an academy ein bericht fur eine akademie is a short story by franz kafka written and published in 1917 in the story an ape named red peter who has learned to behave like a human presents to an academy the story of how he effected his transformation the story was first published by martin buber in the german monthly der jude along with another of kafka s stories jackals and arabs schakale und araber the story appeared again in a 1919 collection titled ein landarzt a country doctor wikipedia for more ebooks visit kartindo.com
