this work focuses on the political philosophy and the constitutional transformation of the contradiction between two major nations in one land namely palestine israel while the notion of the nation state has permeated the levant since the 1917 british crusade into jerusalem the organic demographic actuality of the country s population is incompatible with the dominance of one nation in one land with the subsequent degeneration into the series of war crimes that began in 1947 to move away from this conception of a zionist state requires another methodology that offers an alternative to the domination of one nation by another that is rationalized by the myths of nation building promoted by the nationalist school of thought with an approach that is inter national in the root meaning of the term this book fuses the jewish bundist

concept of national cultural autonomy with the process of constituent assemblies as an expression of the parallel civil societies that become an organic social construction codified in a federal constitution by avoiding the notion of the nation state this exit may then be named the no state solution

the current literature on dynamic systems is quite comprehensive and system theory's mathematical jargon can remain quite complicated thus there is a need for a compendium of accessible research that involves the broad range of fields that dynamic systems can cover including engineering life sciences and the environment and which can connect researchers in these fields the handbook of research on modeling analysis and control of complex systems is a comprehensive reference book that describes the recent developments in a wide range of areas including the modeling analysis and control of dynamic systems as well as explores related applications the book acts as a forum for researchers seeking to understand the latest theory findings and software problem experiments covering topics that include chaotic maps predictive modeling random bit generation and software bug prediction this book is ideal for professionals academicians researchers and students in the fields of electrical engineering computer science control engineering robotics power systems and biomedical engineering

almost half a century ago the Australian National University's TB Millar penned a seminal book on Australian defence policy in the lead up to the Vietnam War today Australia's defence forces are returning from long conflicts overseas while the rise of China and the economic integration in the Indo Pacific presents a complex mix of challenges and opportunities drawing inspiration from Millar's original volume Australia's Defence Towards a New Era brings together leading experts to examine the domestic and international context of Australia's defence policy Australian Strategy and the size and state of our armed forces as the country heads towards a new era this book provides an in depth overview and key insights into the past present and future of Australia's defence

war is too important to be left to the generals declared French Prime Minister Georges Clemenceau over a century ago but which civilians exactly play the most important roles in controlling the armed forces when civilian control is studied the focus is typically on those in the upper echelons of the executive branch presidents prime ministers or defense secretaries yet because civilians in the executive may be tempted to hide problems or use the military in controversial ways researchers must extend Clemenceau's dictum if war is too important to be left to the generals civilian control is too important to leave with the executive this book aims to understand the similarities and differences among the world's democracies regarding the role of legislatures in democratic civil military relations drawing on over a dozen cases from across the globe the authors examine how most legislatures face capability and motivational impediments to conducting truly robust oversight and propose realistic reforms to strengthen military accountability to elected officials and the public the heart of the civil military relationship

combining theoretical and empirical approaches this book examines the role that international public administrations play in global environmental politics in the Anthropocene with chapters written by leading experts in the field this text offers fresh insight into how international bureaucracies shape global policies in the complex

areas of climate change biodiversity and development policy international public administrations are thus recognized as partially autonomous actors with their own interests and motivations assuming the roles of managers orchestrators brokers or attention seekers this comprehensive resource provides scholars and practitioners with valuable insight into environmental policymaking and how international public administrations might be transformed to better address the multiple fundamental challenges of our century this is one of a series of publications associated with the earth system governance project for more publications see cambridge org earth system governance this title is also available as open access on cambridge core

a comprehensive proposal for reforming copyright law to ensure sustainable public access to research and scholarship open access is widely supported by researchers librarians scholarly societies and research funders as well as large and small publishers yet despite this support and the pandemic s demonstration of the importance of open access for scientific progress the scholarly publishing market is failing to deliver open access quickly enough in copyright s broken promise john willinsky presents the case for reforming copyright law so that it supports rather than impedes public access to research and scholarship he draws on the legal strategy of statutory licensing to set out the terms and structures by which the copyright act could ensure that publishers are fairly compensated for providing immediate open access what sets willinsky s analysis apart is its focus on the current state of scholarly publishing because copyright offers so little legal support for moving publishing to open access though it is best for science he says it is time to stop regarding the copyright act as a law of nature that can only be circumvented contravened or temporarily set aside specifically he proposes that the copyright act add a new category of work called research publications which would be subject to statutory licensing this would allow publishers to receive royalty payments from the principal institutional users universities industry r d research institutes and so on and sponsors of the work foundations and government agencies while providing immediate open access

bringing together issues that are highly relevant to contemporary japanese foreign policy this comprehensive text analyzes the formation of the north korea policy in the context of great power relations in east asia

a fortnightly bulletin on financial and political trends
