toward a cultural archive of la movida revisits the cultural and social milieu in which lamovida an explosion of artistic production in the late 1970s and early 1980s was articulated discursively aesthetically socially and politically we connect this experience with a broader national and international context that takes it beyond the city of madrid and outside the borders of spain this collection of essays links the political and social undertakings of this cultural period with youth movements in spain and other international counter cultural or underground movements moving away from biographical experiences or the identification of further participants and works that belong to lamovida the articles collected in this volume situate this movement

within the political and social development of post franco spain finally it also offers a reading of recent politically motivated recoveries of this cultural phenomenon through exhibitions state sponsored documentaries musicals or tourist itineraries the perception of spain as representative of a successful dual transition from dictatorship to democracy and free market capitalism created a spanish model that has been emulated in countries like portugal argentina chile and hungary all formerly ruled by totalitarian regimes while social scientists study the promises contradictions and failures of the spanish transición especially on issues of memory repression and the lack of reconciliation our approach from the humanities offers another vantage point to a wider discussion of an unfinished chapter in recent spanish history by focusing on lamovida as the cultural archive whose cultural transitions parallel the political and economic ones the transgressive urban nature of this movement demonstrated an overt desire especially among spanish youth to reach onto a global arena emulating the punk and new wave aesthetic of such cities as london new york paris and berlin art design film music fashion during this period helped to forge a sense of a modern urban identity in spain that also reflected the tensions between modernity and tradition global forces and local values international mass media technology and regional customs

this revised edition examines major redevelopment efforts in new york and london to uncover the forces behind these investment cycles and the role that public policy can play in moderating market instability it chronicles the progress of three development projects in new york and three in london
