the history of philosophy is like an epic novel there are revered ancestors who through great suffering establish traditions for the betterment of their descendants there are black sheep of the family who stir up trouble embarrass their brothers and sisters and sometimes even invite the wrath of political and religious authorities there are bitter feuds between families that last generations often with no clear victor ever emerging as the saga passes from one era to another there is some feeling of progress old fashioned ways are discarded and replaced with new although sometimes faddish ones thus the history of philosophy is an adventure of ideas to use the words of one great philosopher this book attempts to describe a major thread of that drama

the concept of history reflects on the presuppositions behind the contemporary understanding of history that often remain implicit and not spelled out it is a critique of the modern understanding of history that presents it as universal and teleological progressively moving forward to an end although few contemporary philosophers and historians maintain the view that there is strict universality and teleology in history the remnants of these positions still affect our understanding of history but if history is not universal and singular evolving toward an objective universal end it should be possible to admit of multiple histories some of which we appropriate as our own an another important aspect of this book is that it provides an account of history that is itself both historical and rooted in attempts to narrate and explain history from its inception in antiquity the book seeks to establish features or constituents of history that might be found in any historical account and might themselves be considered historical invariants in history
